

AI Ranking of Companies in China and Africa

Overview

Ranking the top 30 countries by AI competitiveness using Stanford's AI Vibrancy Tool, from R&D to policy and talent. What are the top 10 AI tools from China in March 2026?

The China AI Tools Ranking presents the leading 10 AI tools and companies headquartered in China. This ranking is based on the combined performance of each Chinese AI tool across three metrics: website traffic, investment, and review scores. A. The global AI superpowers aren't necessarily who you'd think they'd be. While China leads the world with 230 AI clusters, the United States leads with 50% of global compute power for AI, according to a new report on global AI superpowers by TRG Datacenters. In second and third place for AI compute. One name that's making headlines lately is DeepSeek, a Chinese AI model gaining attention for its powerful language models. But DeepSeek isn't the only player in this advancing space.
