We have seen an immediate reduction in our energy bills and a change in our power consumption patterns since we installed the PVMARS off-grid solar power system.

This power, transmitted through 500 kV double circuit transmission lines from Turkmenistan to Afghanistan, will power nearly one million households and energize Afghanistan's industries.

The forecasts are based on extensive research into the fuel price policies of each country. They are updated monthly to take into account the latest policy changes and oil price projections.

Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your ...
