

## Automatic stripping machine for sheathed optical cables

## Automatic stripping machine for sheathed optical cables

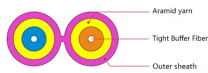

The machine adopts 16 wheels belt feeding, feeding high precision, cutting error is small, the outer skin without embossing marks and scratches, greatly improve product quality, the use of servo knife ...

Engineered for efficiency and accuracy, this model integrates both wire stripping and cable jacket splitting functions, making it an ideal solution for manufacturers and technicians working with delicate ...

JCW-CS19M is a fully automatic high-power cable cutting stripping machine covering multi-core sheathed cable and single-core wire. This machine can handle sheathed cable with a maximum ...

The machine adopts 24 wheels belt feeding, feeding high precision, cutting error is small, the outer skin without embossing marks and scratches, greatly improve product quality, the use of servo knife ...

Something that's automatic is done without thinking, almost as if you're a well-programmed machine. The word automatic can be used to describe a machine that works on its own, performing its tasks ...

**AUTOMATIC** definition: having the capability of starting, operating, moving, etc., independently. See examples of automatic used in a sentence.

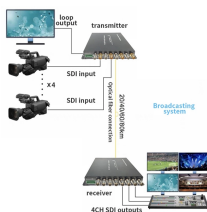

Discover automatic sheath stripping machines with CE certification. Explore wire stripper solutions for cable manufacturing, featuring semi-auto to full-auto options, precise stripping lengths, and durable ...

If something such as an action or a punishment is automatic, it happens without people needing to think about it because it is the result of a fixed rule or method.

**AUTOMATIC** definition: 1. An automatic machine or device is able to operate independently of human control: 2. An.... Learn more.

This high-performance machine integrates multiple functionalities, completing the shearing of aramid fibers, jacket stripping, and outer sheath crimping in one seamless operation, significantly reducing ...

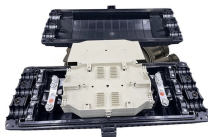

The FBT-3000 automatic fiber peeling machine is a new type of optical cable end processing equipment, which is based on the eagerness of optical fiber connector manufacturers to improve production ...

AUTOMATIC meaning: 1. An automatic machine or device is able to operate independently of human control: 2. An.... Learn more.

spontaneous, impulsive, instinctive, automatic, mechanical mean acting or activated without deliberation. spontaneous implies lack of prompting and connotes naturalness.

Acting or operating in a manner essentially independent of external influence or control: an automatic light switch; a budget deficit that triggered automatic spending cuts.

It features advanced technology for efficient and accurate operation. With its reliable performance, it saves time and labor. Ideal for various cable processing needs.

An automatic machine or device is one that has controls that enable it to perform a task without needing to be constantly operated by a person. Automatic methods and processes involve the use of such ...

Adjective automatic (comparative more automatic, superlative most automatic) (superlative dubious) Capable of operating without external control or intervention.

This machine is designed for cutting the total length and stripping the outer jacket at one end or both ends of multi-core round sheathed cables such as power plug wires, sensor sheathed wires, and ...

Equipped with mid-span stripping at up to 13 locations, a silent hybrid stepper motor, and tungsten steel blades, it's designed for demanding tasks in electronics labs, wiring production lines, and cable ...

I can't drive her car because it has a manual transmission instead of an automatic transmission. [=a system that changes gears at different speeds without direct control by the driver]
