

Base Station Energy Solution Low-Temperature Resistant for Smart Building Use

Overview

The Base Station Energy Cabinet is a fully enclosed, weather-resistant telecom energy cabinet designed to provide reliable power distribution and battery backup for outdoor communication networks. By its nature, however, dealing with the thermal issue becomes crucial. It integrates AC and DC power systems, intelligent monitoring units, and environmental control modules. Highjoule powers off-grid base stations with smart, stable, and green energy. Consider this: A single base station serving 5,000 users consumes 3-5 kW daily.
