

British Fiber Optic Sensor Technology Company

Motor protection controller

Overview

FISO is a leading developer and manufacturer of fiber optic sensors & signal conditioners used in medical, energy, process control, and R&D applications. Need help finding the right monitoring solution for your project?

Sensornet provides the world's most advanced asset monitoring solutions, using real-time distributed temperature, strain, and pressure measuring. Empowering the world with advanced, customizable distributed fiber optic sensing (DFOS) solutions. Luna Technologies have collated a wealth of resources around Hyperion / FBG technology and the ODiSI Distributed Sensing technology. We pioneer the use of fiber optic vibration sensing to deliver railway insights across multiple disciplines. We monitor track condition, detect trespass and cable security events, and alert operators to natural hazards such as landslides or rock falls.

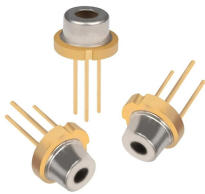

British Fiber Optic Sensor Technology Company

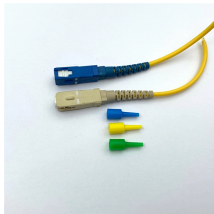

Sensornet provides the world's most advanced asset monitoring solutions, using real-time distributed temperature, strain, and pressure measuring systems.

CTEC is a leading designer, manufacturer and supplier of high quality fibre optic products in the UK.

The company plans to grow its team, accelerate product development, and prepare for commercial rollouts across Europe and beyond. Its base in Kristiansund, Norway and a UK ...

We create the most compelling fiber optic sensing solutions, empowering the world optimize assets, protect lives and the environment.

Sengenia was founded over a decade ago and is solely focused on bringing innovative sensing solutions to a wide range of sectors. Luna Technologies have collated a wealth of resources around Hyperion / ...

We pioneer the use of fiber optic vibration sensing to deliver railway insights across multiple disciplines. We monitor track condition, detect trespass and cable security events, and alert ...

With hubs in the UK, USA and India, in 2025 Sintela has delivered and installed ONYX™ on assets covering over 55,000 km, making it the most rapidly adopted Distributed Fiber Optic Sensing (DFOS) ...

Our portfolio of distributed temperature, strain and acoustic sensing-based solutions help our customers to turn data into decisions. As a leading independent provider of fibre optic-based distributed sensing ...

The company, Bandweaver, has been providing advanced fiber optic monitoring sensors and integrated technologies since 2002.
