Prepared by the World Economic Forum's Centre for Urban Transformation in partnership with Posten Bring and Hitachi ZeroCarbon, this promising practice shows how Norway's largest logistics operator scaled electric fleets without major grid upgrades, providing practical lessons for policy-makers and. Luoyang Baiwei Intelligent Technology Co. is a technical service company based on the Internet and Internet of Things technology, integrating software and hardware research and development, sales, operation and maintenance, and service in one. Unil's automation journey began in 2008 in connection with rapidly increasing demand. The 51,000m² distribution centre with chamber heights up to 27m has been built

near Oslo airport. The building consists of fifteen warehouse chambers with product storage temperatures ranging from -25 o C to +25 o C, plus banana ripening chambers and four separate office locations spread around. Stadium is Sweden's largest sports chain, with approximately 160 stores in Sweden, Finland and Germany. Its recent expansion into Norway has required extensive warehousing and inventory management solutions.

Case Study of Smart Distribution Boxes in Norway

COOP Norge operates over 900 supermarkets in Norway. To improve their distribution centre productivity the business required a new fully automated distribution centre. The 51,000m 2 ...

The highly automated distribution centre is located at Sande, approximately 60 km south of Oslo, Norway, and is split into two different temperature zones: ambient and frozen with 28,700 overall ...

Hitachi's ZeroCarbon's end-to-end service ticked a lot of boxes, and through our deployment of ZeroCarbon Charge, we achieved complete visibility into the health and performance of our key ...

Check out our logistics case studies to find out what successful logistics automation looks like in practice. Read all about it!

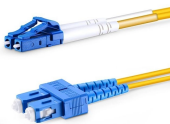

Even with the grid and hardware under control, Norway's winters required adaptation of Posten Bring's operations using real-time monitoring and software logic to maintain reliability in cold ...

From the list of mapped flexibility initiatives, we have picked 10 of them to investigate and present as case studies. These were picked so that they together met several criteria. They should focus on ...

The Norwegian customer ordered 2 main smart parcel delivery lockers and 2 sub-smart parcel delivery lockers from our company. The color of the cabinet, the size and quantity of the grille ...

The developed simulation model shows that smart boxes not only are a viable approach for efficient last mile deliveries, but also result in considerably smaller travel dis-tances compared to conventional ...

Length:14.5mm
Small-end inner diameter:2.0mm
Large-end inner diameter:3.5mm
Outer diameter:5.2mm

Discover how Swisslog designed and implemented Unil's highly automated high bay warehouse for ambient and frozen food in Norway.

This paper evaluates the cost and emissions implications of alternative solutions for last-mile delivery. A case study proposes and analyzes alternative expansion plans for a parcel locker ...

This case study demonstrates how one company effectively integrated automated parcel lockers, capillary distribution, and crowdshipping into their supply chain processes.

Stadium's success depends on fast and accurate delivery from a three-zone stock directory of over 12,000 items, direct to online consumers and to retail stores - so Constructor's solution not only had ...
