

CentOS 7 does not recognize optical modules

Overview

In the recent Kernel update (3. 2) our systems not longer recognize optical dvd drives. Has anyone else had this issue, and if so, how did you resolve it?

This guide introduces how to read optical module information when it is installed on a network card in a Linux system. Check. SFP modules are commonly used in networking equipment, such as switches, routers, and network interface cards, to provide flexibility in connecting different types of optical and electrical interfaces. When I try yo use QCU to configure the interface it does not recognize the interface, but when I. My optical drive isn't recognized, but works fine before booting up Linux and in when I use the 5. Drives: Local Storage: total: 238.

CentOS 7 does not recognize optical modules

The network card does not come live - I have it connected to another R610 with IXGBE interfaces through a optical/copper interface - which shows that the optical interfaces of the XL710 ...

Below you can see all the steps including showing that Linux won't allow the SFP AFTER I unloaded and reloaded the module. ... The best I found was but I don't have a RHEL subscription.

In some cases, the SFP serial number may not be accessible or may not be provided by the module itself. Therefore, if you don't see the serial number in the ethtool ...

But ultimately what I'm trying to use it with is MakeMKV and it is not detected. The program can't find any usable optical drives. Dolphin and Handbrake also do not recognize the drive, ...

For optical modules used on switches, we read their information via brand-specific terminal commands. This guide introduces how to read optical module information when it is installed ...

Optical Drives no longer recognized In the recent Kernel update (3.10.0-1160.36.2) our systems not longer recognize optical dvd drives. If we reboot and drop to the prior kernel, they work fine. Has ...

We built a similar machine and the USB port was working fine but I do not have access to it at the moment. See below the USB device is visible from dmesg and lsusb but does not show in ...
