

Columbia JXF Distribution Box

Columbia JXF Distribution Box

JXF Control box JXF small distribution box is a widely used device in low-voltage power systems, designed for the distribution and control of electrical energy. Suitable for various buildings, industrial, ...

We will present the performance, safe operation methods, and technical parameters of JXF low-voltage distribution box

JXF Distribution box is suitable for three-phase three wire, three-phase four wire, and three-phase five wire systems with 50Hz, 500V and below, and load current not exceeding 250A provides ...

Designed for a standard lifespan of 8-10 years, these boxes can be extended to 15 years through optimized load management and enhanced maintenance. The standard JXF box has a maximum ...

JXF series low voltage distribution box is compact terminal distribution equipment specially designed for building distribution systems with main busbar rated current covering 10A to 400A, suitable for AC ...

The JP outdoor integrated distribution box is a multifunctional outdoor power distribution device that combines metering, outgoing lines, reactive power compensation, and other functions. It integrates ...

The JXF Distribution Box offers robust protection against overloads, short circuits, phase failures, and leakage, ensuring your motor and distribution systems operate safely and reliably.

The JXF control box is a customizable distribution box designed according to the model, specifications, and quantity of components to fulfill various control functions.

Note: The indoor concealed box can be customized. To order such indoor box, a letter "R" is specified when ordering; to order the concealed box sized 250 x 200 x 140, the order number is JXF252014R.

Installation Diagram Open-mounted distribution box installation method: Assemble four bolts into the four holes on the corners and tighten them into the expansion pipes to fix the box.
