

# Commonly used cable tray specifications in steel mills

## Overview

Each cable tray type uses dimensions differently: Ladder trays prioritize width, side rail height, and thickness for heavy loads. Perforated trays balance containment with ventilation, reducing usable area. The work covered under this section consists of the furnishing of all necessary labor, supervision, materials, equipment, tests and services to install complete cable tray systems as shown on the drawings. Cable tray systems are defined to include, but are not limited to straight sections of. ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require additional protec eferred to support and protect numerous small. Hubbell's NEXTFRAME® Ladder Tray is the effective and widely used cable runway that supports and delivers bundles of cable between cabinets, racks, and closets, along walls, and suspended from ceilings. The Ladder Tray features light, rugged, tubular steel construction. It consists of bearing bars and cross bars welded together to form a grid-like structure.
