

Compensation issue for buried fiber optic cables

Overview

On June 25, final approval for a \$4.8 million CenturyLink fiber-optic cable class action settlement was given by a New Mexico judge, resolving claims brought forth by state landowners that CenturyLink Inc. buried fiber-optic cables near on under their property on top of railroad rights of ways. This section covers Agency requirements for fiber optic service entrance cables intended for aerial installation either by attachment to a support strand or by an integrated self-supporting arrangement, for underground application by placement in a duct, or for buried installations by trenching. The depth at which cable lines must be buried is governed by a combination of local, state, and national regulations,

designed to ensure safety, prevent damage, and maintain infrastructure integrity. These laws typically specify minimum burial depths based on the type of cable (e. It will close back up in a few weeks. They gave me a plain old drip cable and “buried” it this way. After 2x of this I had them run it aerial to my house.

Compensation issue for buried fiber optic cables

While fiber projects do not typically trigger hauling requirements, some may require longer bore shots to avoid impacts to environmentally regulated areas. Increased equipment weight is reviewed for such ...
