

# Complete List of Three-Level Distribution Box Models

## Overview

This article describes the Cisco three-layer hierarchical model which includes the Access, Distribution, and Core layers. This techpaper provides an overview of three-tier and two-tier switch network topologies and the hierarchy layers of an enterprise LAN. Highest priority devices come first, followed by lower priority devices, and lowest priority devices last in the chain. We recommend the Cisco CCNA Gold Bootcamp as your main CCNA training course.
