

Current Status of Power Wires and Fiber Optic Cables in El Salvador

Overview

Given the increase in electricity demand in the residential, industrial, and commercial sectors, AES El Salvador developed during this 2025 a series of strengthening and expansion projects in its electrical distribution network that benefited more than 1.6 million. Numerous projects carried out during this year are part of a strategy to ensure that the power supply operates without interruptions and keeps pace with the country's growth, thus maintaining service continuity and boosting national development. New 1,800 km cable will connect El Salvador to major international hubs, boosting high-speed internet capacity and resiliency. The regulatory authority responsible for spectrum development is the SIGET, El Salvador's telecom regulator, has chosen Liberty Networks as the provider to design, construct, deploy, and operate the country's first submarine cable.
