

## Customization Process for Upgraded Version of Relay Protection ODN Optical Distribution Network

### Overview

The present document describes the general guidance on Optical Distribution Network (ODN) quick construction and digitalization. ODN components: Access product manuals, HedEx documents, product images and visio stencils. A centralized OTDR-based solution is the core of this evolved methodology, which greatly improves the visibility and operation efficiency in maintaining ODN quality and resilience. In the present document "shall", "shall not", "should", "should not", "may", "need not", "will", "will not", "can" and "cannot" are to be interpreted as described. The Optical Distribution Network (ODN) is a communication pathway base that affects performance, reliability, and scalability. It also covers ODN protection strategies like fiber backup and OLT interface backup. There are no specific requirements for this document.

The present document describes the composition of the digitalized quick ODN and the general requirements on physical label, digitalized quick ODN devices, intelligent management terminal, ...

This document describes the Gigabit Passive Optical Network (GPON) technology and how it functions.

Discover everything you need to know about Optical Distribution Networks (ODN) in FTTH. Learn ODN components, architecture, optical loss calculation, and expert design tips.

The Light ODN solution accurately plans the ODN network. With the pre-connectorized products, light-weight construction of ODN, splicing-free, and rapid construction.

This document provides guidance on optical distribution network (ODN) design for fiber-to-the-home (FTTH) deployments. It discusses ODN topology design including star, ring and bus configurations. It ...
