

Dimensions of cable management racks used in supercomputing centers

Overview

Racks up to 30 inches wide are available, leaving extra space for cable management or power distribution units (PDUs). Panduit builds on years of experience as a leader in cable management, integrating best practices, and application knowledge to develop highly reliable and efficient physical infrastructure solutions. Our comprehensive offering of vertical cable management, horizontal cable management, and rack. When deciding where to place an SU, many important factors including power capacity, cooling capacity, cable routing and management, and adjacent equipment requirements are usually considered. The Channel Type Cable Manager bring you simple wiring experience, more carefree. Designed with 24 perforated channels, each one corresponding to another. Clear markings make it easy to search and replace cables.
