

## Discussion on Domestic AI Servers

### Overview

SoftBank Corp has initiated discussions with US chip giant Nvidia and Taiwanese manufacturer Foxconn to develop a domestic production system for artificial intelligence servers. The plan, reported by Nikkei, signals a significant move to strengthen Japan's technology infrastructure. The company aims to assemble components initially, then Fujitsu begins domestic manufacturing of sovereign AI servers in March 2026 at its Ishikawa factory. However, the release on November 30, 2022, of the ChatGPT chatbot and virtual assistant took the IT world by storm, making GenAI a household term and starting off a stampede to develop AI-related.
