Distributed Data Center Solutions

Today SPAN announced the launch of XFRA, a distributed data center solution designed to deliver gigawatts of new compute capacity amidst today's growing power infrastructure constraints.

JLL's experts are experienced in every phase of the data center lifecycle to help you evaluate, scale, optimize, and maintain efficiencies in your data center strategy. Our team is trained from colocation ...

Whether your infrastructure is a single network closet or hyperscale, our data center solutions can help you power a more efficient, sustainable and secure data center. Explore the path that best fits your ...

Unlock your data center capacity and global scale with a comprehensive data center power and compute portfolio from Flex.

Every data center facility in our network features redundant power, advanced cooling, carrier diversity, and strict data center security. Request a data center tour or connect with our specialists by phone or ...

With a presence in over 50 countries and a robust AEC partner ecosystem, Wesco delivers the expertise, products and support necessary for the entire lifecycle of your data center. An end-to-end ...

Equinix operates data centers engineered for reliability at global scale for more than 300 Global Fortune 500 companies. Modernize with a complete stack: physical connectivity, software-defined ...

One in four data centers run on ABB technology. From cloud environments to gigawatt-scale AI, we work side by side with customers and partners to deliver the world's most advanced ...

We help facility managers, operators, and owners minimize downtime, and increase reliability, automation & performance with reliable end-to-end services for all of your critical power ...

Our modular infrastructure solutions scale AI and cloud computing capacity while minimizing capital risk and deployment delays.
