

Dominic Direct Fusion Optical Cable Terminal Box

Dominic Direct Fusion Optical Cable Terminal Box

The terminal box is used to separate the optical fiber and store it in the optical cable. By using one of the panels, optical fibers can be spliced to a single optical fiber on other cables, allowing ...

A pre-assembled terminal distribution box is an ideal supporting device for the wiring between optical nodes and terminal equipment in fiber optic transmission networks.

Their primary function is to protect and manage the spliced fiber optic cables, ensuring they remain secure, well-organized, and unaffected by environmental factors.

Feel free to contact tarluz for your ODC/FDT/OCC requirement. Product Features.

This 4 strand optical fiber distribution box is used for the fusion splicing, splitting, wiring transmission and other functions of the optical transmission terminal. It can effectively terminate, protect and manage ...

Through the optical fiber terminal box, the optical fiber drawn from the optical cable is fused with the pigtail, and then the excess optical fiber is coiled and stored, and the fusion joint is protected.

- It is composed of case body, fiber optical splice tray and adaptor fixing frame. - It is devised into two parts, one links with optical cables for fusion connection between optical cable and fiber pigtail and ...

FTB integrates the storage, management, splicing, and termination of fiber optic cables in a single unit. It is designed to be managed, maintained, and installed with ease.

We offer a wide range of 1-24 core FDB boxes and ODF cabinets for indoor/outdoor FTTX deployment. Durable, IP65 rated, and easy to install. Browse our models and get a wholesale quote.

Our fiber optic splice trays and boxes provide a secure and organized solution for managing fiber splices in various network environments. These enclosures protect delicate spliced fibers, ensuring long ...
