

## Fiber optic cable turning device

### Overview

The Zinger is designed to be used with a cordless or electric drill to assist in pushing or pulling fiber optic cable, a fiberglass rodder, or other types of stiff wire or cable (product) through a conduit. It can also pull a string or mule tape through a duct or conduit. Our termination kits, for example, are equipped with all of the necessary tools — pin and socket polishing tools, jacket strippers. 2 Pieces— 2-piece kits include a wire cutter with high-carbon stainless steel blades that are strong enough to cut through optic fibers, wire insulation, and cable ties. They also include a wire stripper that has three openings for stripping different thicknesses of fiber-optic cable jackets down. A fiber optic toolkit comprises essential equipment, indispensable for any professional technician. With carefully chosen products housed in portable cases, technicians can efficiently and accurately complete tasks, ensuring seamless network operations. The inclusion of appropriate test equipment.

## Fiber optic cable turning device
