

## Fire emergency optical cable

## Fire emergency optical cable

Lifeline® fire-resistive cable systems are designed to ensure the operation of critical fire alarm systems and emergency circuits in the event of fire or water exposure.

CommScope designs and manufactures a comprehensive line of fiber optic cables—from outside plant to indoor/outdoor and fire-rated indoor fiber cables.

FO331-XX-OM4-000-LZ, fire resistant mono tube cable featuring heat resistant mica tape, glass yarns and an LSZH jacket making it suitable for use in applications such as fire alarm systems which ...

The first UL flame listed optical cable designed for indoor/outdoor use in vital communication and emergency systems that need to be operational during fire. The cable has a patented design that ...

APAR offers 2F to 512 F optical fibre cables, in armoured and unarmoured designs. The cable ensures operation for 3 hours in fires up to 750°C. The cable is halogen-free and flame retardant, to protect ...

Fire-Resistant Optical Cables are specially designed to maintain data transmission integrity even in the event of a fire. Constructed with materials that resist combustion and prevent the spread of flames, ...

Lifeline® QFCI is the first UL flame listed optical cable designed for indoor/outdoor use in vital communication and emergency systems that need to be operational during fire. The cable has a ...

A 2-hour fire-rated fiber optic cable utilizes non-combustible materials that prevent ignition or flame spread, which is crucial for keeping emergency paths clear and allowing quick evacuation.

This innovative cable features a patented design that ensures functionality for over three hours in temperatures reaching 1000°C. It is halogen-free and flame-retardant, providing protection against ...

For fire-critical areas, choose fire-resistant, LSZH fiber optic cables that are certified (e.g., FE180 and CPR B2ca) to maintain transmission and minimise smoke/toxic gases during a fire.
