

How many routers are needed for gigabit fiber optic internet

Overview

You don't need a special router, per se, but you do need one that can handle the speed fiber provides. If you're paying for gigabit fiber service, make sure your router supports at least gigabit Ethernet ports and dual-band or tri-band WiFi (like WiFi 5 or WiFi 6). Fiber optic internet offers incredible speed and reliability. You'll typically need an Optical Network Terminal (ONT) provided by your installer, an Ethernet cable to connect the ONT to your router, and your own high-performance router. No complex tools are generally required for setup, as it's. Not all routers can handle fiber internet's blazing speeds, making it essential to choose equipment rated for your plan's maximum throughput. However, the market is flooded with countless options, making the selection quite overwhelming. Otherwise, the other products we list either use a 2.

How many routers are needed for gigabit fiber optic internet

Learn about essential fiber internet equipment including ONTs, fiber routers, and setup requirements. Compare equipment options and find the best internet providers in your area.
