

How tall is the electrical distribution box in front of the building in Samoa

Overview

This policy is an important tool to use for the essential stage in the planning and design of any new building. A building is defined as a structure with enclosed or open walls and a roof, for either residential, commercial, industrial, religious, educational or special use. The National Building Code of Samoa (NBCS) is a performance-based set of standards that provides objectives and descriptions of how a building and site should be constructed to achieve a structurally sound and sustainable built environment. [int/sites/default/files/nbc-draft-2017-february15-final-for-staples-8x11_samoa.pdf](https://www.epc.gov.fj/int/sites/default/files/nbc-draft-2017-february15-final-for-staples-8x11_samoa.pdf). As a performance based document, the NBC describes the. On this page, you will find EPC's publications, including Annual Reports, Corporate Plans, Statements of Corporate Objectives, Mandates, and the Laws, Regulations, and Policies that govern EPC's operations.
