

How to connect two broadband lines to a switch

Overview

Connect any LAN ports on the 1st router to the port in a switch. Is there some way we could connect two lines (which we would take from two different providers so we would have redundancy if one failed) and merge them into one signal which we could distribute?

Is there some sort of setup that can do this?

Of course we have the option of a leased line but for. Therefore it is common to expand the number of Ethernet ports by adding an additional switch or switches to the network.
