How to easily remove the beam splitter

I was cleaning the viewfinder in an old minolta "A" rangefinder and the angled beam splitter/semi silvered glass was real hazy. When I went to clean the side that is towards your eye, the ...

Options range from laser beam combiners designed for specific laser wavelengths to broadband hot and cold mirrors for splitting visible and infrared light. This type of beamsplitter is commonly used in ...

Before towing make sure the log splitter is correctly and securely attached to the vehicle and the safety chains attached with enough slack to allow for turning.

Ok I just tested it with my laser rifle and adding the beam splitter changes the damage from 371 per shot to 4 x 75 per shot - a reduction of 71 damage and a 4x reduction in condition

If you somehow manage to separate the pieces of the original beam splitter, I highly recommend you attach the new beam splitter plate to the other half since this will align it perfectly. If ...

You don't have to ever do this but if you want to, here's how!

Remove the spark plug and pour about 14.8 mL (1/2 ounce) of oil into the cylinder. Using the Recoil, crank the engine slowly to distribute the oil and lubricate the cylinder.

It really isn't hard to do this yourself. follow my instructions on how to remove the top plate and you can have a new fresh beamsplitter in your Leica for a fraction of the cost and a few hours, not weeks or ...

Using the ring wrench from micro tools, remove the bezel around the optical wedge and also the RF window. Then using a spanner wrench or needle nose pliers, carefully turn the optical ...

I recently collaborated with Chris from filmismorefun and made a video about how to clean the beam splitter in your rangefinder camera as well as how to improve the rangefinder patch too.
