

How to find the optical cable reel number on the optical cable

Overview

The cable identifier: An alphanumeric code that differentiates this cable from other cables within your facility. Make sure you use a consistent format, such as "FB-03-A142" where FB indicates fiber, 03 is either the zone or floor while A142 represents the exact cable. The text on the cable starts with the Corning product name "Corning Rocket Ribbon (TM) Optical Cable," date of manufacture "01/2022" and a serial number. Here is the most important information: 864F means the cable contains 864 fibersSM. The FCR-1000 series cable reels are designed to fit Princetel's standard FORJs and slip rings. The rotary joints are protected inside the drum for durability and seamless deployment of single or multi-channel fiber optic and/or electrical cable with uninterrupted optical and/or electrical signal. A bulk reel of optical fiber cable always has a reel tag attached. The packaging greatly reduces set-up time for each pull.

How to find the optical cable reel number on the optical cable
