## Huawei Technology Convergence Switch

Realize wired and wireless convergence from access to core, manage up to 10,240 APs with a single switch, and achieve simplified O& M with unified user authentication.

The S7700 series provide service optimization features like wired and wireless convergence, unified user management, quality awareness (iPCA), H-QoS, and united security.

Huawei CloudEngine S6330-H is a fixed agile switch with 10GE downlink and 100GE uplink ports. The CloudEngine S6330-H can be used as the core device in an enterprise branch network or a small- or ...

The S9300 series switches (S9300 for short) are next-generation high-end terabit routing switches developed by Huawei designed for multiservice convergence.

Introduces basic principles and application scenarios of the wired and wireless convergence feature supported by S series switches.

Through this single switch, the network provides centralized management, authentication, and policy control for both wired and wireless services, truly implementing wired and wireless ...

CloudEngine S8700 series smart routing switches (S8700 for short) are high-end switches designed by Huawei for next-generation enterprise networks.

Huawei campus switches are ideal for building future-proof campus networks with simplified management, high reliability, and service intelligence, across industries such as enterprises, ...

The S9300 supports the smart PoE technology and uses different energy management configurations according to the Powered Device (PD) type, ensuring flexible energy management.

Huawei S Series Switches have been widely used in Wide Area Network (WAN), MAN, and data center networks, building application-oriented network platforms for carriers and integrating switching and ...
