

Iran Special Optical Cable

Iran Special Optical Cable

Iran has announced a sweeping new mandate to take full control of seven critical undersea fiber-optic cables passing through the Strait of Hormuz, a move that threatens to turn the ...

Iran warned last week that submarine cables in the Strait of Hormuz were a vulnerable point for the region's digital economy, raising concerns about potential attacks on critical infrastructure.

Iran is reportedly weighing a new plan aimed at profiting from the undersea fiber-optic cables running through the Strait of Hormuz, according to Tasnim News Agency. The cables reportedly handle ...

Fibre-optic cables beneath the Strait of Hormuz carry data for hundreds of millions of people across the Gulf region, Asia, Africa, and Europe.

IRGC-affiliated media calls for imposing "protection" payments on the undersea fiber optic cables that pass through the Strait of Hormuz.

And the recent explosive growth of cloud computing has vastly increased the volume and sensitivity of data – from military documents to scientific research – crossing these cables. ...

Iran's Islamic Revolutionary Guard Corps (IRGC) has signalled that undersea fibre-optic cables in the Strait of Hormuz and Persian Gulf could be targeted, escalating tensions from maritime ...

The report, circulated widely on Telegram, identifies at least seven major submarine communication cables transiting the narrow strait, noting that more than 97 percent of the world's ...

Subsea cables are fiber-optic or electrical cables laid on the sea floor to transmit data and power. They carry around 99% of the world's internet traffic.

Recent discussions surrounding the vulnerability of Iranian underwater fiber optic cables have highlighted significant security concerns, particularly in the context of geopolitical tensions.
