

Iran's stockpile of 400g of EDFA

Overview

According to the latest International Atomic Energy Agency (IAEA) report from May 2025, Iran possessed approximately 408.6 kg of uranium enriched to 60 percent U-235 as of May 17, 2025. This represents a significant increase of 133.8 kg since the previous quarterly report. On June 13, Israel began a series of decisive strikes on Iranian nuclear and military sites. The United States continued the job on June 22, delaying Tehran's nuclear ambitions and, with them, Tehran's fanatical dash to destroy the Jewish state and usher in an apocalyptic ' Twelver Paradise. The uranium stockpile is. Nuclear experts now believe Iran relocated more than 400 kilograms of highly enriched uranium—enough for 10 nuclear weapons—to a secret location, a move that has left U. That program, to date, has yielded just over 400 kilograms of.
