

## Israel needs fiber optic cables

### Overview

Bezek is expected to connect 80% of Israeli households to high speed Internet infrastructure, in small localities and in large cities; in the social and geographical periphery and in the center of the country; amongst the Arab and Jewish population; within the Green Line and in Judea. Bezek is expected to connect 80% of Israeli households to high speed Internet infrastructure, in small localities and in large cities; in the social and geographical periphery and in the center of the country; amongst the Arab and Jewish population; within the Green Line and in Judea. Following Bezek's announcement of the planned deployment of fiber optic infrastructure in 80% of households in Israel, the Ministry of Communications is promoting the deployment of fiber optic infrastructure in areas lacking economic viability and is publishing a clarion call for subsidized. Tel Aviv, November 24 (ANI/TPS): The inter-ministerial tender committee led by the Ministry of Communications decided on a quick mechanism for transferring payments from the incentive fund to companies operating in the combat zones and in the rest of the country as part of the first.

## Israel needs fiber optic cables

In a bold move to enhance regional connectivity, Israel has unveiled plans to construct a remarkable 254-kilometre (158-mile) fibre-optic cable spanning from the Mediterranean to the Red Sea.

The Ministry of Communications has set a goal to achieve 45% of homes connected to fiber optic by the end of 2021 and 85% connected to fiber optic by 2025.

Eighty-three percent of Israeli households nationwide now have access to fiber-optic cables, with the ministry aiming to offer such accessibility to all homes by 2027.

Already this year, in areas where fiber-optic alternatives exist, companies will no longer be required to connect new subscribers using copper or ...

Israel's prime minister is floating the idea of building infrastructure projects such as a fiber optic cable linking countries in Asia and the Arabian Peninsula with Europe through Israel and Cyprus.

So far, about 2.4 million households in Israel have had access to fiber-optic cables. (ANI/TPS)
