

# KVM switcher home key conflict

## Overview

"My keyboard does not have a Scroll Lock button ● Use Right-Ctrl, Right-Ctrl, 1, or 2 to confirm the trigger isn't already set to Scroll Lock. ● Press and hold the yellow switch button for 15 seconds. If KVM beeps, turn it off and back on. The hotkey trigger will now. So my recent setup involves a dual monitor and computer KVM switch so I can switch between my home computer and my work laptop. On the laptop side which is the problematic one, I will have everything working for like 15 min until all of a sudden my keyboard keys won't work. It allows us to switch between multiple PCs using just one set of keyboard, mouse, and one (or more) monitor. Not only that, I haven't made any changes to my hardware setup, which is extra confusing. com 's USB2AA2M can be used for. Look in Reliability History/Monitor and Event Viewer for any error codes, warnings, or even informational events being captured or logged just before or at the time the keyboard and/or mouse stop working.

## KVM switcher home key conflict

I have been a happy user of the Level1Techs KVM for about 4 years, but today I have lost the ability to switch between the connected PC's with the hotkey from the keyboard.

The USB ports on a KVM switch act like a USB hub. Therefore, KVM switches require both a video cable and a USB cable to connect to each computer to allow both the video and the ...
