

Large-span stepped straight-through cable tray

Large-span stepped straight-through cable tray

Husky Ladder Cable Tray systems consists of two longitudinal side members connected by individual transverse members, and is designed for use as a power cable or control cable support system.

The straight sections and fittings feature perforations along the side rail to allow you to quickly and easily alter the system. Plus, add-rung-kits allow you to add rung at any location along the length of the tray ...

The Ladder Tray features light, rugged, tubular steel construction. It is designed for mechanical support and strain relief in long runs of cable and creates a smooth gradual bend for cable. Rail and stringer ...

This product line is designed for applications with extremely heavy loads and long spans. Tray systems are available in lengths of 30, 40 and 50 feet to accommodate 30-50 foot support spans.

Without proper supports, connectors and fasteners, tray performance cannot be achieved on site. Use the installation methods below to match your tray size, span, and mounting conditions.

Different from normal cable trays, Large span cable tray has large supporting span with high loading capacities. Large span cable tray is assembled by pultruded FRP profiles.

Choose from our selection of cable trays, including over 850 products in a wide range of styles and sizes. Same and Next Day Delivery.

These longer-length cable tray sections are ideal for industrial and commercial applications such as roadway crossings and pipe bridges or lowering installation costs by reducing the number of ...

Available in 3, 4, and 6-inch widths with ventilated or solid bottoms, channel cable tray is ideal for smaller instrumentation cables and cable tray runs involving a small number of cables.

Refers to the approximate height of a cable tray used for specifying. Selecting a specific height will show cable trays with that height, as well as cable tray accessories compatible with that height.
