

Linux optical module configuration

Overview

This document describes the installation and configuration of optical disk drives for Linux. Many of the articles are presented as is or with modifications without the actual hardware to double check the correctness. This example uses the Moduletek SFP-10G-LR module connected to an Intel X520. NVIDIA® Cumulus Linux is the first full-featured Debian bookworm -based, Linux operating system for the networking industry. • EEPROM data encoded/decoded in key/value pairs. Same API: Any Linux-based NOS, any switch, any module vendor, any module type.
