

Managed Switch and Soft Router Aggregation

Overview

Please refer to MX Load Balancing and Uplink Preferences for details on how to implement. Aggregation services in routers and edge platforms help enable network edge routing. Its primary goal is to increase network scalability by providing a single place to interconnect multiple access switches and the core layer. A key. Provides 1G, 2. 5G, and 10G speeds for flexible customization, ensuring optimal performance, compatibility, and scalability Flexible interface options like copper, fiber, and PoE ensure seamless integration and cost-effective deployment Supports stacking for easier management, improved redundancy. Link Aggregation is a nebulous term used to describe various implementations and underlying technologies.
