

Mauritius Optical Cable Vibration Damper

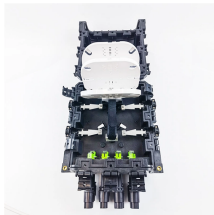

Mauritius Optical Cable Vibration Damper

Effective spiral vibration dampers to protect ADSS and aerial fiber optic cables from wind-induced fatigue, ensuring long-term reliability.

Made of weather-resistant, non-corrosive plastic, these dampers have a large, helically-formed damping section sized for the ADSS cable. A smaller gripping section gently grips the ADSS cable. Each ...

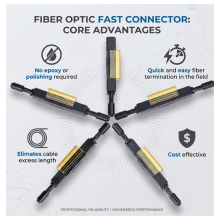

Vibration Dampers work to cancel damaging fatigue caused by wind-induced vibration. Most tuned damping devices operate best near their natural frequencies.

Such as spiral vibration damper and anti-bird stings, to reduce the impact of wind vibration and external force damage on optical fiber cables. Fix the direction of the optical fiber cable from the tower to the ...

This damper is especially designed for installation with ADSS fibre optic cables, improving the performance of the conventional stockbridge vibration damper when used with this kind of cables.

Wind-induced vibration of aerial conductors is common worldwide and can cause conductor fatigue near a hardware attachment. It will reduce the service life of ADSS or OPGW cables.

Because of the concentrated stress, vibration damper will cause some damages to the cable. The armor rods provide proper stress distribution on the optical cable and protect the cable.

Shop high-quality fiber optic cabling vibration dampers for reliable performance. Find durable, UV-resistant options from top suppliers. Perfect for ADSS and OPGW cables.

With wide frequency range, the 4D vibration damper can highly consume vibration energy, and effectively dissipate the energy caused by cable Aeolian vibration, reduce cable vibration horizontal, ...

The VORTX Vibration Damper responds to wind-induced line vibration that is characterized by high-frequency, low-amplitude motion commonly known as aeolian vibration.
