

Monaco Mobile Fiber Optic Communication

Overview

Monaco is now 100% covered by the fiber optic network, four years after the rollout of the high-speed internet service began. Thanks to Wi-Fi 6, the Monaco Telecom Fiber Pro Box manages many devices connected simultaneously without degrading the bandwidth. The Internet speed is optimised and the latency minimised. A single state-concessioned provider — Monaco Telecom — delivers residential. Monaco Telecom, the primary telecommunications operator in the Principality of Monaco, has completed the deployment of its fiber broadband network, providing 100% coverage to the entire country except for some buildings currently undergoing renovation. With this, the strategic decision of the state. Since the end of January, no residents have used Monaco Telecom's copper network to access the internet. Now the countdown has begun for businesses. From August 1, telephone calls and access to the internet will have to rely on new technologies or risk no longer working.
