

Nano Optical Module Company

Overview

This section provides a list of the top 10 Optical Module manufacturers, Website links, company profile, locations is provided for each company. NIL Technology (NILT) is a solutions company at the forefront of design, development, and mass production of revolutionary meta-optics (or metalenses) and meta-optics based devices, including our new metaEye™ Ultra-Compact Camera. Metalenses by NILT are taking optical solutions to a new level with. Episode 5 with Rafik Ward: What are the primary drivers of CPO adoption?

Powering hyperscale data centers with cutting-edge technology. Escape will cancel and close the window. This modal can be closed by pressing the Escape key or activating the. The number of venture-backed optical component startups has exploded - the Optical Component Start-Up Tracker identifies these companies and their value propositions. ("Goeroptics"), a subsidiary of Goertek, has unveiled its latest full-color augmented reality (AR) etching waveguide module, Star G-E1, and its proprietary DLP (Digital Light Processing) 3D printing light engine at the SPIE (International Society for

Optics and. At Holographix, we custom design and manufacture precision optical components, assemblies, and modules with cutting-edge technology and collaborative engineering—empowering your innovation on every critical project. Cost-effective, high-quality custom microlens arrays for demanding customer.

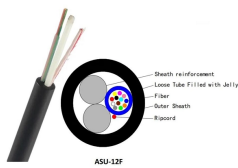

Nano Optical Module Company

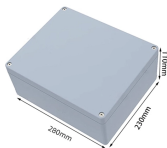

The number of venture-backed optical component startups has exploded - the Optical Component Start-Up Tracker identifies these companies and their value propositions.

MALTA, N.Y., May 4, 2026 - GlobalFoundries (Nasdaq: GFS) (GF) today announced the introduction of its SCALE™ optical module solution for co-packaged optics (CPO). GF's SCALE ...

Discover how Lumentum enables innovation through optical and photonic technologies for cloud networking, 3D sensing, lasers, and advanced manufacturing.

The company operates several research groups and laboratories, focusing on functional materials, optical nanocharacterization, and biophotonic applications, among others.

Zygo-Navitar offers the leading metrology and imaging solutions to aerospace customers through precision manufacturing to ensure the highest level of quality control and regulation compliance.

The company's products for the data communication market include 25G to 400G optical transceiver modules, active optical cables (AOCs) and high-speed copper cables for internal interconnection in ...

At Holographix, we custom design and manufacture precision optical components, assemblies, and modules with cutting-edge technology and collaborative engineering—empowering your innovation ...

Since 2017, Goeroptics has been developing DLP projection light engines, providing end-to-end solutions from optical design to assembly. The company continues to expand its research and ...

The company continues to expand its research and manufacturing capabilities in micro-nano optical components and laser modules. Looking ahead, ...

NIL Technology is full solution company enabled by meta-optics. We are your source for world-class masters for AR waveguides, high-volume mass production of meta-optics, and module solutions.

The company continues to expand its research and manufacturing capabilities in micro-nano optical components and laser modules. Looking ahead, Goeroptics remains committed to ...
