

Pigtail tied too tightly

Overview

Wearing tight ponytails can cause breakage when you let your hair down. We've all noticed strands stuck to hair ties, which can be frustrating. Hair is 95% keratin—a fibrous protein that's also found in your nails and skin. It is found both in the cuticle of. Tying your hair too tightly, particularly on a consistent basis, can lead to a range of unwelcome consequences, from headaches and discomfort to traction alopecia, a potentially irreversible form of hair loss. Understanding the mechanisms behind these effects is crucial for maintaining hair health. Most people tie their hair without a second thought, never realizing it could be damaging. Securing your hair is often necessary, whether you're working, exercising, or enduring a hot day. What is Traction Alopecia?

Pigtail tied too tightly

Ponytails and other tight, tied-up hairstyles can cause a form of hair loss that's referred to as traction alopecia. Unlike pattern hair loss, hair loss caused by traction alopecia typically isn't ...
