

Risks in Optical Cable Procurement

Overview

The procurement of materials such as fiber optic cable, towers, and other infrastructure components can be subject to price fluctuations, supply chain disruptions, and quality control issues. These risks extend beyond operational disruptions and financial losses, encompassing reputational damage and critical security breaches. To navigate this challenging landscape, telecom companies must prioritize the mitigation of these risks through a robust and proactive approach to monitoring. Discover the top international trends affecting procurement in the global Fiber Optic Cable market. We explore the changes that have shaped the industry since our last report, focusing on ways to accelerate private builds and the ripple effects of federal funding initiatives such as. As global broadband initiatives mature in 2026, the transition from traditional Gigabit PON to symmetrical XGS-PON and preliminary 25G-PON architectures has placed unprecedented strain on the outside plant (OSP) physical layer.
