Key dimensions

Samoa floor-standing distribution box model

Samoa YBF Series Wind Power Box-type Substation
Strong integration, easy installation, short construction period, low operating costs, high structural strength, and strong corrosion resistance

Founded in 1995, and re-organised in 2009, Dongguan Aosen Electrical Equipment Co., Ltd. is a Hi-Tech enterprise headquartered in Dongguan City, Guangdong Province, mainland China, which ...

Suitable for use in power distribution systems in industrial and mining enterprises, residential communities, high-rise buildings, and other places for receiving and distributing electrical energy.

We provide an extensive range of type-tested distribution boards for low-voltage (LV) electrical systems that are suitable for residential, commercial, and industrial properties.

SP-XL low-voltage power distribution cabinet is suitable for three-phase three-wire, three-phase four-wire, three-phase five-wire system of 400V and below, and is ...

Samoa GGD Type AC Low Voltage Distribution Cabinet The GGD type AC low-voltage distribution panel is a technical development project issued by the former Ministry of Energy in 1992

Samoa power strips and PDU power distribution units for surface mount, rack mount and general purpose applications. Multiple outlet power strips are manufactured in accordance to Samoa ...

It is a new type of prefabricated substation developed for the special usage requirements of wind power generation, featuring strong integration, easy installation, short construction period, low operating ...

The XL type low-voltage power distribution cabinet uses domestically designed new components. The enclosure is made of bent steel plates, featuring a compact structure, easy maintenance, and flexible ...

Starting from compact boards for energy distribution applications up to floor standing energy supplying switchboards for huge sites of manufacturers or office buildings ABB offers a wide range of wall- and ...

SP-XL low-voltage power distribution cabinet is suitable for three-phase three-wire, three-phase four-wire, three-phase five-wire system of 400V and below, and is used for power lighting distribution.
