

Seismic Supports for Cable Trays and Busbars

Seismic Supports for Cable Trays and Busbars

UNISTRUT Seismic Bracing Solutions contractors, Specifiers, and others. We have decades of experience with real-world applications in severe seismic zones, supplying world-class products and solutions. ...

Eaton's TOLCO seismic bracing solutions help protect people and non-structural components during an earthquake. For over 60 years, the mechanical, electrical, and fire protection trades have relied on ...

Seismic support is designed to protect pipes, ducts, and other suspended systems from lateral movement during seismic events. Its main goal is to mitigate the horizontal shaking caused by an ...

Download the catalog to learn more about our assemblies featuring TOLCO seismic products and B-Line series products that are pre-approved for California Building Code (CBC) 2013, 2016 and 2022.

We offer a pre-engineered, time-saving solution which braces and secures non-structural equipment within a building to minimize damage from earthquakes or seismic events.

This article discusses the importance of seismic resistance for cable trays, detailing when seismic braces are necessary, the factors that affect seismic resistance, and how to ensure your ...

Guidelines are presented here for conducting in-plant seismic ruggedness review of conduit, cable trays, and their support systems. The in-plant review has two purposes.

Seismic Cable Bracing Systems for Lighting or HVAC designed & engineered to limit sway during a seismic event. Strong, easy to install, and cost-effective.

Length:35.0mm
Small-end inner diameter:5.0mm
Large-end inner diameter:4.0mm
Outer diameter:6.0mm

Features Kit contains items needed for seismic bracing long cable tray runs. Each kit contains: (4) 11" cables with mounting eyelets (2) Metal brackets for attachment to support members (4) Cable clamp ...

Reliable support systems for cable tray and busbars, designed for electrical and mechanical installations. Available in corrosion-resistant coatings.
