### Overview

Single-mode fiber cables have a smaller core diameter and allow only one mode of light to propagate through the fiber, resulting in less signal attenuation and higher bandwidth over longer distances. They can be used in indoor and outdoor applications. 2-D fiber optic bundle, or fiber bundle optics, such as the linear fiber bundle, uses flat-bottom. There are different types of fiber optic cables because each type is optimized for specific applications that have unique requirements for bandwidth, transmission distance, and environmental factors. Whether you need high-speed connections for data centers, mining, broadcasting, or. Check each product page for other buying options.
