

Technical Support ADSS Optical Cable G 652

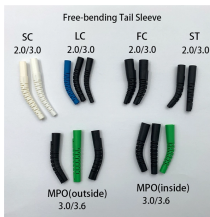

Technical Support ADSS Optical Cable G 652

Cable Specification Central Strength Member (CSM): glass fiber reinforced plastic rod (GFRP), with PE sheath covering when needed. Loose Tube: PBT plastic material, containing 12 fibers and filled with ...

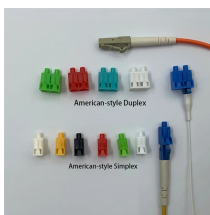

This document provides specifications for an all dielectric self-supporting aerial cable (ADSS cable) produced by Shenzhen KSD Cable Co., Ltd. The cable uses single-mode G.652D optical fibers in ...

All-dielectric self-supporting (ADSS) cable is a type of optical fiber cable that is strong enough to support itself between structures without using conductive metal elements.

This specification covers the design requirements and performance standard for the supply of optical fibre cable in the industry. It also includes ARTIC premium designed cable with optical, mechanical ...

Parameters are subject to change without notice.

The ADSS (all-dielectric self-supporting) cable is designed for aerial cable installation and deployment, which is suitable for various outdoor applications.

APPLICABLE STANDARDS IEC / EN 60793-2-50 type B-652.D ITU-T Recommendation G.652.D

It is used by electrical utility companies as a communications medium, installed along existing overhead transmission lines and often sharing the same support structures as the electrical conductors.

The mechanical and environmental performance of the cable are in accordance with the following table. Unless otherwise specified, all attenuation measurements required in this section shall be performed ...

This specification covers the construction all dielectric self-supporting Optical Fiber Cable (ADSS) properties for outdoor application. The optical fiber cable contains 24 cores (6cores/tube) single ...
