

# The switch's optical port is not emitting light

© 2025 HHC Networks & Smart City Solutions

## Overview

If the link light for the port does not come on, you can consider these possibilities: Connect cable from switch to a known good device. Make sure that both ends of the cable are plugged into the correct ports. Below is a practical mapping used by teams doing transceiver failure troubleshooting in production networks. Laser not emitting: TX power reads near zero; bias current may be normal or abnormal depending on failure mode. The table describes the LED status indicators for Ethernet modules or fixed-configuration switches: Ensure that both sides have a link. A single broken wire or one shutdown port can cause the problem where one side has a link light, but the other side does not. The S3100 series does not have a Power indicator. During the switch's boot process, all panel. Summary: The purpose of this guide is to provide general guidelines for troubleshoot layer 1 connectivity issues when using transceivers in Ethernet switches. Please select a product to check article relevancy This is for Layer 1 connectivity, if the link shows "up/up," but expected traffic is not. Have you ever experienced an unexpected network outage due to the failure of an SFP/SFP+ optical transceiver?

Network outages can bring your ability to communicate and work to a halt, and your IT team will likely be frantically looking for a solution. S3100 SERIES SWITCHES TROUBLESHOOTING GUIDE.

The switch s optical port is not emitting light

PrerequisitesTroubleshoot The Physical LayerTroubleshoot The Most Common Port and Interface Commands For Cisco iOSUnderstand The Specific Port and Interface Counter Output For Cisco iOSCommon System Error MessagesCommon Port and Interface ProblemsRelated InformationThis table shows the most common commands used to troubleshoot the port or interface problems on switches that run Cisco IOS System Software on the Supervisor. Note: The right hand column on the next table gives a brief description of what the command does and lists any exceptions to the use per platform. If you have the output of the supported com...See more on cisco Published: Nov 3, 2023.sb\_doct\_txt{color:#4007a2;font-size:11px;line-height:21px;margin-right:3px;vertical-align:super}.b\_dark .sb\_doct\_txt{color:#82c7ff}fs

If your link goes down after swapping optics, you need transceiver failure troubleshooting that is fast, measurable, and safe for live ports. This article helps network engineers, field techs, and ...

The purpose of this guide is to provide general guidelines for troubleshoot layer 1 connectivity issues when using transceivers in Ethernet switches.

I know you gotta switch default output device to get it to output audio via the optical port, but I notice that there is no light signal coming out of the port, it just remains dark (on my evga, it ...

This is because the switch does not know that the connected device is a PC; the switch only knows that the port has changed the state. In order to resolve this issue, Cisco has developed ...

If the issue is with the optical module, use a blower (e.g., a rubber bulb) or strong wind (e.g., from a fan) to blow or suck the TX and RX ports of the optical module, then test the connection status of the ...

In this article, you'll learn about some of the reasons why the indicator lights on your switch don't light up when you connect a computer and how to fix them.

It may be that we are using old firmware (14.1X53-D27.3) on our QFX switch. Once this issue start happening, we have plugged and unplugged the transceivers at both ends, changed the ports and in ...

If the issue is with the optical module, use a blower or strong wind (e.g., from a fan) to blow or suck the TX and RX ports of the optical module, then test the connection status...

What tools are needed for SFP troubleshooting?  
The main tools needed will always be an optical power meter, a fiber optic cleaning kit, a visual fault locator, and access to the switch CLI ...

If this is off (or all lights are off), the Optical Network Terminator (ONT) cannot detect your Fibre Hub. Check that the red end of your broadband cable is correctly inserted into your Fibre Hub's red ...
