

Total global fiber optic cable mileage

Overview

Global fiber optic cable deployment reached 1.2 million route kilometers in 2023, up 22% from 2021. FTTH (Fiber-to-the-Home) penetration was 52% in Europe in 2023, compared to 18% in Africa. The average cost to deploy fiber to a new home in the U.S. was \$750 in 2023, down 15% from 2021. Fibre-optic Link Around the Globe (FLAG) is a 28,000-kilometre-long (17,398 mi; 15,119 nmi) fibre optic mostly-submarine communications cable that connects the United Kingdom, Japan, India, and many places in between. The cable is operated by Global Cloud Xchange, a former subsidiary of RCOM. This visualization shows the growth of the undersea cable network, global internet peering capacity, and the distribution of IP addresses via BGP announcements over time. Use the controls at the top to play the animation or step through year by year. These networks enable internet access, support financial markets, and connect billions of people worldwide. Analyze network nodes within a 10 km radius using our automated API service. The system runs from the.
