

Unshielded flame-retardant optical cable

Unshielded flame-retardant optical cable

Our Cables contain Low smoke and Zero Halogen materials and achieve complete toxicity benefits for safety evacuation during fire, this why they are called “ Fire Survival Cables “.

ETK Kablo''s B2ca-classified fiber optic range provides low smoke emission, zero halogen content, and exceptional flame retardance. The design ensures data link continuity even during extended fire ...

Circuit Defender™ Cables meet various industry code requirements (NFPA 70, NFPA 101, NFPA 130, and NFPA 502) for Fire Resistance according to UL 2196 when selected and installed per applicable ...

Fire-Resistant Optical Cables are specially designed to maintain data transmission integrity even in the event of a fire. Constructed with materials that resist combustion and prevent the spread of flames, ...

Corning Optical Communications manufactures quality flame retardant optical fiber cables for indoor applications, which comply with the requirements of the National Electric Code® (NEC® 2023) ...

CPR fire-resistant optical cables with Euroclass Dca, Cca, and B2ca classifications. Safety and performance for critical applications.

Prysmian's Lifeline® fire-resistive cables are engineered to reduce the devastating impact of fire. They feature innovative ceramifiable silicone technology that ensures essential communication and power ...

This innovative cable features a patented design that ensures functionality for over three hours in temperatures reaching 1000°C. It is halogen-free and flame-retardant, providing protection against ...

Lifeline® QFCI is the first UL flame listed optical cable designed for indoor/outdoor use in vital communication and emergency systems that need to be operational during fire. The cable has a ...

This FireTuf fibre range is fully compliant with fire resistant standards IEC 60331-25 and flame retardant standards IEC 60332-2-3-24C, guaranteeing the cables circuit integrity and performance in the event ...
