

## Use a normal router with 100Mbps fiber optic internet

### Overview

Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. This guide will break down everything you. Fiber optic internet represents a significant leap in internet technology, utilizing thin strands of glass or plastic to transmit data as pulses of light. This method offers vastly superior speeds, lower latency, and greater reliability compared to traditional copper-based technologies like DSL and. For fiber, your router needs the right WAN connection, speed support, and Wi-Fi capabilities. Routers designed for DSL (which uses phone line inputs) or cable (which uses coaxial inputs) won't work. It requires a compatible fiber optic modem or ONT. To use it, you'll need a router that supports high-speed data transfer. Fiber optic cable: Typically a thin, yellow cable with.
