

Using a 150M router with gigabit fiber broadband

Overview

Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. Check for ISP Restrictions: Some ISPs require authentication or specific router settings. The top routers for gigabit internet need big memories, a fast processor, and support for the latest internet standards to get the most out of your internet plan.
