

## Uzbekistan has no mobile fiber optic cables

### Overview

Over the past eight years, more than 300,000 kilometers of fiber-optic communication lines have been built across the country, and almost all populated areas are now connected to mobile internet. Additionally, seven modern data centers have been launched to process and store.

Telecommunications networks in Uzbekistan are largely based on Soviet-built infrastructure but with many modern additions, making the country one of the leading influences in the region in informational development. In 2012, the telecommunications services volume grew by 22.5% year-on-year. Trans-Caspian fiber-optic cable project due to be completed by late 2026. With over 36 million. The Joint Stock Company “National Electric Networks of Uzbekistan” (hereinafter - NEGU) is implementing the investment project titled “Enhancing the Stability of the Power Transmission System of the Republic of Uzbekistan”, financed with the participation of the Asian Infrastructure Investment Bank. In recent years, Uzbekistan's digital infrastructure has been rapidly developing – 99 percent of the country's settlements are now covered by mobile communication. This was announced on October 21 during a videoconference chaired by President Shavkat

Mirziyoyev dedicated to the development of.
