

West Africa Fiber Optic Cable Installation

Overview

This map shows the reach of WIOCC's regional fibre optic network, which reached 75,000-km during 2024. WIOCC's regional network comprises the national transmission backbones of its shareholders in ten African countries, and networks leased from partner operators in. This is a list of terrestrial fibre optic cable projects in Africa. While submarine communications cables are used to connect countries and continents to the Internet, terrestrial fibre optic cables are used to extend this connectivity to landlocked countries or to urban centers within a country. The launch of 2Africa enables us to offer our customers seamless connection between Africa and Europe, together with our SEA-ME-WE 5 and AAE-1 subsea cable resources to further extend to Asia, which is an important milestone of our global development strategy," said Jessica Gu, Director & Chief. We build and operate critical infrastructure for intra-African and international connectivity, enabling your business to expand seamlessly across borders, access new markets and deliver reliable digital services at scale. Our services start from design through to trenching, ducting, fibre blowing, splicing, installation, commissioning and maintenance. Point-to-point FTTx, GPON and EPON connections.
