

Western Europe Telecom Backbone Optical Cable

Western Europe Telecom Backbone Optical Cable

Explore the physical backbone of the internet with our interactive map of undersea fiber optic cables, peering exchange points, and more. Visualize the growth of global connectivity.

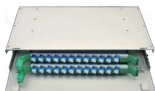

Collectively, these fiber-optic systems stretch approximately 1.4–1.5 million kilometre along the seabed, forming the backbone of global digital connectivity.

The system will provide a high-capacity, low-latency data route across the Mediterranean Sea, entering Europe through Albania and Italy, and continuing via a new terrestrial optical backbone ...
