

What does optical fiber optic cable line mean

Overview

It converts optical signals transmitted over fiber cables into electrical signals that can be used by routers, computers, IP phones, and other devices within a local network. An Optical Network Terminal (ONT) is a critical device in fiber-optic networks, enabling high-speed, stable connectivity for homes, businesses, hotels, and smart infrastructure projects. Understanding how ONTs function within a fiber network helps network planners, ISPs, and enterprise IT teams. A high neutrophil count or white blood cell count can indicate a variety of diverse conditions, no all of which are harmful. The test must be done in conjunction with other diagnostic measures to determine a diagnosis. Neutrophils are a type of white blood cell that helps the body fight infections.
